Christiana Care Health System Dental Clinic
Wilmington, Delaware

Program Overview
The Christiana Care Health System operates a dental clinic at Wilmington Hospital and four satellite dental clinics in the Wilmington, Delaware area. The clinic keeps the service fees at a reduced level to provide comprehensive dental care to individuals who lack insurance or who are underinsured. The treatment is performed by dental residents who have completed their undergraduate training but have chosen to spend time as hospital residents before going into private practice. These residents also rotate through the hospital’s anesthesia and emergency departments to gain a comprehensive picture of the hospital population’s medical needs and to become trained to treat people who are medically compromised or have a disability.

Program History and Development
The Department of Oral Maxillofacial Surgery & Hospital Dentistry in the Christiana Care Health System has provided dental services to the Wilmington community for over 60 years. It is a major teaching hospital with two campuses and more than 250 medical-dental residents and fellows. Although care is mainly provided at the dental clinic located in Wilmington Hospital, dental residents now rotate to four other affiliated dental clinics to provide dental care at these locations as well.

Program Sustainability
- Funding for this program is split between on-going fee-for-service payments, Medicaid reimbursements, and private grants from foundations and associations.
- This clinic provides payment options and financial assistance to individuals who cannot afford their treatment, such as free and discounted services.
- The Christiana Care Health System dental clinic is staffed by dental residents in the hospital with supervision by volunteer dentists and dental school faculty.

Program Impact
- To date, the Christiana Care Health System dental clinic has provided more than 1,500 implants to hundreds of individuals.
- In June 2016, 17 of Christiana Care Medical-Dental staff were among Delaware Today magazine’s Top Dentists.
