

Engaging Community Health Centers in Increasing the Number of Older Adults They Serve

Seattle, Washington

Program Overview

Engaging Community Health Centers in Increasing the Number of Older Adults They Serve is a program based in the state of Washington. Through this program, the Washington Dental Service (WDS) Foundation works to support the Washington Association of Community and Migrant Health Centers (WACMHC) in addressing the needs of low-income individuals. One of the ways in which the WDS Foundation provides support is through the Dental Learning Network (DLN). The DLN, established in 2009, is a group of dental directors who collaborate quarterly. Meetings cover a variety of topics including changes in health policy, and allow open discussion and time for sharing best practices, strategies, and problem solving. The overall goal is to improve disease prevention, operations and financial sustainability.
