

## Oral Health Improvement through Outreach Multiple locations throughout Ohio

### Program Overview

The OHIO (Oral Health Improvement through Outreach) Project allows senior dental students to spend 50 days providing dental care in several of 23 affiliated community clinics throughout Ohio under the direct supervision of a licensed dentist. Students are exposed to multiple dental technologies, observe various practice management models, practice four-handed dentistry, and increase their speed and confidence all while serving a community in need of affordable care. The OHIO Project has produced outcomes benefiting both Ohioans in need of dental care and the next generation of dental professionals by building stronger partnerships with underserved communities. The program also enhances a community service ethic and social responsibility within its students. It aims to equip future dentists with community-oriented competencies necessary to practice in a changing health care environment.
