

Smile Alabama! Statewide throughout Alabama

Program Overview

The *Smile Alabama!* Initiative, which was funded from 2000 to 2004, was an education and outreach program designed to increase dental care access and improve outcomes for Medicaid-eligible children. The main components of the program included provider education and reimbursement, dental reimbursement, parent education, and claims processing assistance. The program was designed to support providers and increase their participation in child dental care in Alabama, as well as encourage positive behaviors among parents, such as bringing their children in for early care and keeping appointments.
