

Utah Refugee Oral Health Program

Multiple locations throughout Utah

Program Overview

The Utah Refugee Health Program previously provided coverage for dental services. The program worked with providers, resettlement agencies, local health departments, the Center for Disease Control and Prevention (CDC) and the Office of Refugee Resettlement to ensure that services were culturally appropriate. While the program covered a variety of types of care and health screenings, dental services included: screenings, cleanings, sealants, x-rays, fillings, extractions, crowns, dentures, root canals, and oral surgery. It served refugees within the first 90 days of their arrival in the United States.
